According to mindful.org, "Mindfulness is the basic human ability to be fully present, aware of where we are and what we're doing, and not overly reactive or overwhelmed by what's going on around us." Mindfulness is found to reduce stress, assist in coping, and gain insight to our own self. During this workshop you will learn about Mindfulness and tools to use. You will have a chance to practice mindfulness by creating a natural "Mindful Mandela".

**Title:** Ripple Effects Mapping**Presented by:** Matt Calvert, UW-Madison, Division of Extension**Location:** Taylor Lower Dining Hall

Like a pebble thrown into a pond, the actions your team takes can have effects across place and time. How does building trust between youth and adults lead to another project? What successful project leads to an investment by a grant or government agency? Telling your impact story is a critical part of keeping momentum going and planning for community change. You will learn an interactive technique for mapping the ripple effects of your work.

This workshop teaches high school aged youth that they are the primary stakeholders of their school district and schools must be held accountable. Objectives: 1) to discuss our experiences with school and understand how certain groups of young people are undervalued in school. 2) to understand how schools are set up to domesticate instead of liberate poor and working class communities of color. 3) discuss how to work to improve public education for all students.
